Bangalore, India

PROFESSIONAL SUMMARY

Data-Driven Analyst with **7.4 years of professional experience**, specializing in automated reporting and end-to-end Business Intelligence. Expert in **Advanced SQL (CTEs, Window Functions, Query Optimization)** and **Power BI (DAX, Star Schema)**, complemented by deep proficiency in **Advanced Excel (VBA, Power Pivot)** for complex financial and operational modeling. Proven track record in utilizing **Python (Pandas/NumPy)** for predictive modeling and **Tableau (LOD Expressions, Sets, and Bins)** for high-impact stakeholder storytelling. Highly skilled in **optimizing report performance** using **aggregations** and bridging the gap between business operations and technical data architecture to ensure **data accuracy** by **validating dashboards** against source systems.

SKILLS

- Technical Skills:** **Advanced SQL** (JOINS, Window Functions, CTEs, Query Optimization), **Python** (Pandas, NumPy, Scikit-Learn, Matplotlib/Seaborn, Requests), **Power BI** (DAX, M-Language, Measures, Star Schema, Relationships), **Tableau** (LOD, Sets, Bins, Calculated Fields), **Advanced Excel** (Pivot Tables, Power Query, Power Pivot, VLOOKUP/XLOOKUP, Macros/VBA, Dashboards), **SQL Server, MySQL, GitHub, Cloud** (Azure/AWS).
- Soft Skills:** Data Storytelling, Stakeholder Management, Cross-functional Collaboration, Complex **Problem Solving**, Logical Thinking, Requirement Gathering.
- Core Competencies:** **Data Analytics**, Business Intelligence (BI), KPI Reporting & Tracking, ETL/ELT Processes, **Data Modeling** (Star/Snowflake Schema), Performance Optimization (Aggregations, Reduced Data Load), **Dashboard Validation**, Trend Analysis & **Forecasting**, Root Cause Analysis (RCA), A/B Testing Simulations, Behavioral Cohort Analysis.

WORK EXPERIENCE

Ai Variant | Apr, 2025 - Jan, 2026

Data Analyst Intern

- BI Delivery:** Deployed **Power BI Service** reports using **Row-Level Security (RLS)** and automated gateway **refreshes** for secure, real-time executive access.
- Tableau Visualization:** Engineered high-impact Tableau dashboards utilizing **LOD Expressions, Sets, Bins, and Calculated Fields** to create granular, **interactive visuals** and **drill-down** views of operational KPIs.
- Data Modelling:** Built efficient **Star Schema** models and relationships in SQL Server for **5M+ records**, using **primary/foreign keys** to optimize query performance and integrity.
- Advanced SQL:** Authored scripts using **CTEs** and **Window Functions** (RANK, LEAD/LAG) to automate **KPI extraction** and validate **dashboard accuracy** against backend source systems.
- Python Automation:** Developed **Python (Pandas, NumPy)** pipelines for **Exploratory Data Analysis (EDA)** and cleaning unstructured data, saving **40% effort**.
- Experimental Design:** Led **A/B testing simulations** and **Behavioral Cohort Analysis** for user retention; translated stats into **product-led growth** narratives.
- Cloud/ETL Integration:** Managed **MySQL** to **Cloud connectivity** using **Power Query (M Language)** and reusable **DAX** Time Intelligence measures for **PoP analysis**.

Achievements:

- Process Efficiency:** Saved **40%** manual time by building automated **Python ETL** pipelines for recurring datasets.
- Optimization:** Boosted dashboard speeds by **25%** using **aggregations** and reduced data load strategies within **Star Schema** architectures.
- Problem Solving:** Resolved **epoch timestamp** and **JSON log issues**, ensuring 100% accuracy in reporting by validating dashboards against source systems.

Convergys India Services Private Limited | Sept, 2022 - March, 2025

Lead, Operations

- BI Architecture:** Developed end-to-end **Power BI dashboards** for **Adobe** using **Star Schema** and **Relationships**, implementing aggregations to optimize **report performance** and reduce data load by **25%**.
- Advanced SQL Analytics:** Engineered **SQL queries** (Joins, Subqueries, Window Functions) on **1M+ rows** to identify churn patterns and **validate dashboard accuracy** against source systems.
- ETL Transformation:** Streamlined pipelines using **Power Query (M language)** to automate cleaning/merging of **SQL Server** and **Excel** datasets.
- Stakeholder Storytelling:** Deployed **Tableau** (LOD, Sets, Bins) and **Power BI storyboards** with **Calculated Fields, Parameters, and Drill-throughs** to present interactive visuals to C-suite.
- Python Automation:** Developed **Python scripts** to extract reusable metrics from **CSV logs**, accelerating reporting for cross-functional teams.
- Forecasting:** Performed **EDA** and **trend forecasting** in **Advanced Excel (Power Pivot)**, identifying **\$500K+** in enterprise upsell opportunities.

Achievements:

- Revenue Impact:** Recovered **\$500K+** in potential revenue through deep-dive statistical analysis of account performance.
- Data Integrity:** Built **SQL validation scripts** ensuring **99.9% accuracy** by validating internal trackers against backend source systems.
- Efficiency:** Reduced manual prep time by **40%** by implementing automated **Power Query ETL** workflows.

- **Data Process Management:** Transitioned legacy manual records into **structured SQL/Excel formats**, achieving **100% data accessibility** for internal audits.
- **Operational Reporting:** Developed weekly **Performance Dashboards** using **Advanced Excel (Pivot Tables, Power Query)** to track KPIs, filters, and **drill-downs** for resource utilization.
- **Data Quality Control:** Performed audits and **aggregations of large datasets** to maintain high-accuracy deliverables by validating data against source systems.
- **Stakeholder Collaboration:** Translated raw data into **actionable summaries** for senior management to optimize service delivery strategies.

Achievements:

- **Efficiency:** Saved **10 hours/week** by identifying manual entry bottlenecks and implementing automated formulas and **reusable metrics**.
- **Accuracy:** Improved reporting reliability by **25%** through standardized **data validation and cleansing protocols** to ensure data integrity.
- **Accessibility:** Migrated **4 years of manual records** into a searchable digital database, optimizing data load and reducing retrieval time by **50%**.

PROJECTS

Stock Market Analysis

- **Financial Data Engineering (SQL):** Engineered a multi-platform pipeline using **SQL Joins and Aggregations** to unify fragmented trading logs; authored scripts using **STDDEV** for **volatility** and programmed the logic for a 1.16 Sharpe Ratio calculation.
- **Full-Stack BI Development:** Architected synchronized dashboards across **Power BI (Star Schema)**, **Tableau (LOD Expressions)**, and **Excel** using **Calculated Fields** and **Parameters** to audit a **\$61M** portfolio and visualize 221M in trade volume.
- **Quantitative Strategy Validation:** Programmed **SQL logic** to verify an elite 89% Trade Win Rate and 100% Order Execution Rate, ensuring **high-precision data integrity** and **zero** missed trade opportunities.
- **Advanced Excel Programming (VBA):** Developed an automated **Excel Trading Terminal** using **VBA Macros** to create a seamless **UI** for instantaneous switching between **Portfolio Summary, Risk, and Ticker** deep dives.
- **Sector & Risk Attribution:** Executed deep-dive attribution analysis to **isolate growth drivers** (e.g., Information Technology at \$20M profit); utilized **data mining** to optimize capital weighting for **high-ROI sectors**.

Crowdfunding Kickstarter

- **Data Engineering (SQL):** Authored advanced **SQL scripts** using **CASE statements** and **Aggregations** to validate dashboards against source systems and to transform **365K+ records** into structured segments, ensuring **100% data integrity**.
- **BI Architecture (Power BI & Tableau):** Architected interactive dashboards utilizing reusable **DAX** and **Calculated Fields** to visualize **\$3.5B** in funding trends; implemented **Slicers/Drill-throughs** for granular stakeholder analysis.
- **Predictive Modeling (Python):** Developed a **Logistic Regression model (Scikit-Learn)** to predict success with **81% accuracy**; performed Feature Importance to identify goal and timing as success drivers.
- **Statistical Insights:** Executed **Exploratory Data Analysis (EDA)** to identify a **38.35% overall success rate** and uncovered high-growth niche categories (e.g., Chiptune at 76.3%) through data mining.
- **Operational Reporting (Excel):** Designed executive **Excel Dashboards** using **Pivot Tables** and **Power Query (M Language)** to synchronize sources, reducing ad-hoc **reporting time by 50%**.

EDUCATION

T.John Institute Of Technology
Bachelor of Engineering (BE) in Computer Science (2014 - 2018)

CERTIFICATIONS

- Academy Accreditation - Databricks Fundamentals - Databricks Academy (2026)
- Data Analytics Internship Certification - Ai Variant (2026)
- Data Analyst Professional Certification - ExcelR (2025)
- Generative AI Mastermind - Outskill (2025)

LANGUAGES

- English
- Hindi
- Urdu
- Kannada

INTERESTS AND HOBBIES

- Tech & Innovation: Generative AI, Cloud Analytics, and Dashboard Design.
- Sports & Strategy: Badminton, Carrom, and Tactical Gaming.
- Creative & Culinary: Sketching, Painting, and Regional Cuisine Exploration.
